

Press release

30 August 2012

CHORUS ENGINEERING srl exhibiting at Expo Plast 2012 in Bucarest

CHORUS ENGINEERING srl is participating in Expo Plast from 3 to 6 October in Bucarest. It will have an information stand and will be giving a presentation on the subject of "Production efficiency". The Romanian representative of the German-Japanese machine-builder Sumitomo (SHI) Demag will have a stand in Hall 107 informing the specialist public all about injection moulding machines and plastic processing.

CHORUS ENGINEERING srl will be contributing to a series of presentations at Expo Plast 2012 on 4 October 2012 at 2.00 pm in the Conference Area. Jens Löwe, Head of Product Management at Sumitomo (SHI) Demag will be giving a paper on the subject of "Improved production efficiency - Possibilities to increase production efficiency with advanced IMM options".

"In my presentation, I will be explaining in depth how injection moulders can make their production more efficient with our 13 activePlus technology modules", says Jens Löwe.

Expert advice on all aspects of injection moulding

CHORUS ENGINEERING srl project engineers will be attend the exhibition stand with comprehensive advice for customers and other interested parties on the planning, design, configuration and commissioning of both injection moulding machines and complex production cells.
